 - a. **Public Works Committee Report:**

 2. Street Department:
 - a. Countryside Drive Culvert: Reviewed failure of road section after excessive rain event. Existing 60 inch metal pipe is deteriorated, making the road susceptible to additional failures. The Street Department is unable to replace the existing pipe due to the depth. PWC recommends City solicit bids to replace the 60-inch metal pipe with two 48-inch HDPE pipes, 3-0.
 - b. Downtown storm water drainage issues: Staff is working to engage a company to CCTV storm water drainage lines to determine causes of blockages and location of lines. City does not have records showing the locations of existing storm water drainage lines in the downtown area, due to the age of the system.
 - c. Pavement preservation system: TJ is meeting with Donelson Construction to learn more about Donelson's PressurePave system that combines crack sealing and a thin asphalt overlay into one application process.

3. **Waste Water:**

- a. Calvird Pump Station: Safety switch replaced by AWR staff. Transducer to be replaced by Alliance Pump, approximately \$3,000. New transducer will provide vital flowage data. An effluent flow meter will not be installed, as previously reported. Calvird PS has struggled with electrical issues since recent storms. Will notify insurance carrier. There are also issues on the inlet side of the pumps in the wet well. Something is hampering flowage, and AWR staff is back-flushing regularly. We will need to have a drier, low-flow period in order to vacuum out the wet well to determine the problem.
- b. WWTP Upgrade: Jon and Christy met with Garver and Ross on 4/20. The process to replace the tilting weirs cannot begin until we have about 3 weeks of dry weather. Concrete replacement in the east sludge basin is on hold until drier weather.
